Pursuing professional Java training from
JSpider/QSpider Thane, Mumbai

ABOUT ME

Aspiring software engineer with specialization in Information Technology, Seeking a challenging position to utilize my technical expertise and problem-solving abilities in designing, implementing, and managing IT solutions.

PROJECTS

Music Recommendation System

- Designed and executed a web application proficient in suggesting personalized music recommendations in accordance with user preferences.
- Streamlined the music discovery process by offering a centralized platform for finding and streaming music, resulting in significant time savings for users.
- Developed a user-friendly interface that intuitively catered to individual tastes, enhancing the overall music browsing and listening experience based on machine learning

Event Management System

- Led the creation of an event management system to facilitate diverse event hosting and initiatives within college settings.
- Focused role on designing and developing an interactive, all-inclusive website for centralized information storage and access.
- Successfully integrated comprehensive event details, schedules, and resources, simplifying information retrieval.
- Designed the website with a user-centric approach, ensuring intuitive navigation and an enhanced user experience.

DECLARATION :

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
